INTRODUCTION

Employees should provide a stress-free work environment, recognize where stress is becoming a problem for staff and take action to reduce stress. Stress at work place reduces productivity, increases management pressure and make people ill in many ways, evidence of which is still increasing. Stress at work place is a common feature and majority people experience it. Workplace stress affects the performance of the brain, including functions of work performance; memory, concentration and learning. Employees also face tremendous pressure as they struggle to respond to the needs of internal and external customers, while struggling to fulfil the requirements of increasing regulatory burdens.

The program is designed for those who need to learn the proven stress management techniques and principles of time management. They will gain how to cope up with priorities, eliminated is tractions, streamline processes and reduce paperwork. Participants will able to immediately apply skills when they are back on the job.
