

ELearning Course Title: NRLL Series M5: Productivity Improvement through Kaizen & Poka Yoke

Registration Fee (including GST):- Rs. 1.500 /-

Kindly Register before 30 December, 2020

Commencement Date/Week: 1st Week of January 2021 (User Login details to access the course will be communicated to the registered user in the 1st week of January, 2021)

About eLearning Program -

Lean is a systematic, continuous improvement approach that concentrates on creating more value for customers by eliminating activities that are considered waste, i.e., any activity or process that consumes resources and adds cost or time without creating value for the customers. Lean applies to the entire organization including supply chain and can provide the foundation for widespread organizational improvement. To "think lean" is to switch from an internal to an external focus. After becoming accepted in the manufacturing industry, lean is increasingly being applied across other sectors from healthcare, retail stores, and banks to offices, call centers, hospitals, and government departments.

With a clarion call for "*Atma-Nirbhar Bharat*" given by our Honorable Prime Minister, it has become imperative on various sectors of the economy to rise up to the occasion and deliver quality products, at least cost, in quick time while ensuring safety and well being of its employees. 'Lean Principles' when applied to various systems and processes would provide us all those benefits and provide us the pedestal to reach greater heights as a country.

With this thought process, National Productivity Council, has come up with a transformational, "**Rapid Lean Learning Course**", designed to familiarize the audience with the philosophy of lean thinking, the application of its various tools and techniques and the lean way of life for overall Productivity Enhancement. This is the fifth module of the series which delves upon Kaizen [Continuous Improvement] & Poka Yoke [Mistake Proofing].

E-Learning Course Coverage:-

Kaizen (Continuous Improvement) is a strategy where employees at all levels of a company work together proactively to achieve regular, incremental improvements in the process. It combines the collective talents within a company to create a powerful engine for improvement.

Poka-Yoke's are mechanisms used to eliminate errors by effectively making it impossible to make mistakes in a given process and they can be used practically everywhere. Participants will learn by various real industry examples from the expert.

Register to learn

- 1. Kaizen definition & Process
- 2. Examples of Kaizen
- 3. Poka Yoke definition & Process
- 4. Examples of Poka Yoke
