

NPC's **LEAN** RAPID **LEARNING COURSE**

E-Learning Course Title: **NRLL Series_M1: Lean – History, Fundamentals & Principles**

Kindly Register before **30 December, 2020**

Registration Fee (including GST):- **Rs. 1,500 /-**

Commencement Date/Week: 1st Week of January 2021 (User Login details to access the course will be communicated to the registered user in the 1st week of January, 2021)

About eLearning Program: -

Lean is a systematic, continuous improvement approach that concentrates on creating more value for customers by eliminating activities that are considered waste, i.e., any activity or process that consumes resources and adds cost or time without creating value for the customers. Lean applies to the entire organization including supply chain and can provide the foundation for widespread organizational improvement. To “think lean” is to switch from an internal to an external focus. After becoming accepted in the manufacturing industry, lean is increasingly being applied across other sectors from healthcare, retail stores, and banks to offices, call centers, hospitals, and government departments.

With a clarion call for “*Atma-Nirbhar Bharat*” given by our Honourable Prime Minister, it has become imperative on various sectors of the economy to rise up to the occasion and deliver quality products, at least cost, in quick time while ensuring safety and well being of its employees. ‘**Lean Principles**’ when applied to various systems and processes would provide us all those benefits and provide us the pedestal to reach greater heights as a country.

With this thought process, National Productivity Council, has come up with a transformational, “**Rapid Lean Learning Course**”, designed to familiarize the audience with the philosophy of lean thinking, the application of its various tools and techniques and the lean way of life for overall Productivity Enhancement. This is the first module of the series which delves upon origins of lean thinking and the fundamentals & principles on which it is implemented.

E-Learning Course Coverage:-

Lean Manufacturing is the most versatile improvement concept for industries. It is a systematic, continuous improvement approach that concentrates on creating more value for customers by eliminating activities that are considered waste, i.e. any activity or process that consumes resources and adds cost or time without creating value for the customers. In the web talk, the journey of lean since inception, its evolution, principles, concepts have been

described in very interesting way. It would help the participant to establish “Lean Thinking” in their organizations.

Register to learn:

1. Inception & Evolution of Lean Manufacturing
2. Fundamental Concepts of Lean Manufacturing
3. Principles and applicability of Lean Manufacturing

Thanks & Regards

Industrial Engineering Team
