

E-Learning Course Title: PHP fundamental course

Registration Fee (including GST):-2000/-

About eLearning Program (Brief One para): -

PHP is a widely used server-side programming language that's become increasingly fast and powerful over the years. PHP works well with HTML and databases, making it a great language for anyone interested in building dynamic web applications.

eLearning Course Coverage (Specify Module details) :-

MODULE I – PHP Environment Setup, Syntax Overview & Introduction

MODULE II- Variable Types, Web Concepts, Functions & Cookies and sessions

Register to learn (Key Learnings' in bullet points)

In this course, you'll be exposed to fundamental programming concepts in PHP.

- Learn how PHP is used in modern web development to create dynamic web pages for visitors.
- Learn about PHP variables and the string and number data types.
- PHP contains built-in functions for completing common (and some niche) tasks. This course will teach you how to find and use functions.
- Learn about PHP ordered and associative arrays and how this data type is used to store, access and manipulate data.

Thanks & Regards
