Participating Country(ies)	All Member Countries
Overseas Participants	19
Local Participants	6
Closing Date	17 September 2025
Remarks	Not Applicable

Objectives	Explore modern tools, techniques, and practices that support creating productive workplaces; share best strategies of organizations in creating conducive workplaces for productivity and sustainable success; and examine ways to strengthen workplace agility and adaptability to enhance long-term engagement and productivity.
Rationale	Workplace productivity has a direct impact on organizational competitiveness and sustainable growth. Rapid changes in technology, workforce expectations, and market conditions require organizations to adopt practical, flexible strategies. Effective practices, such as adaptive leadership, agile systems, and data-driven decision-making are key to improved performance and long-term resilience.
Background	<p>Organizations face increasing challenges in maintaining efficiency, sustaining employee engagement, and optimizing performance. Technological disruptions, shifting work dynamics, and evolving workforce expectations require a structured, proactive approach to workplace productivity.</p> <p>Effective practices to help organizations remain productive and resilient include adaptive leadership, agility, workflow optimization, and data-informed performance measurement. Agility and adaptability are essential to maintain productivity. Organizations that embrace flexible work structures, encourage innovation, and foster a culture of continuous improvement are better positioned to maintain high productivity. Data-driven decision-making enables organizations to set clear goals, track progress, and refine strategies for measurable impact.</p> <p>This workshop highlights effective practices using a range of tools and techniques to enhance efficiency, support innovation, and build resilient teams in a fast-changing environment.</p>
Topics	Leadership strategies for workplace adaptability; Building organizational agility amid change; Modern tools, techniques, and practices for productive workplaces; Practical workflow optimization techniques; Data-driven productivity and key performance indicator systems of organizations; and Balancing efficiency, innovation, and well-being in boosting workplace productivity.
Outcome	Participants gain a practical understanding of enhancing productivity and develop skills to lead more adaptable, efficient teams and implement data-driven systems for continuous performance improvement in both daily operations and long-term planning.
Qualifications	Human resources professionals in the private sector, including SME managers, team leaders, and organizational development specialists, and those involved in productivity, operations, or workplace transformation.

Please refer to the implementation procedures circulated with this document for further details.
