

CHAIRMAN, KPMG INDIA SPEAKS

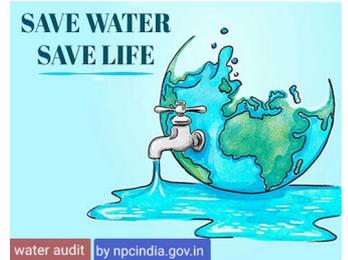

Productivity is key to advance national economic development and per capita income. Higher productivity is critical to global competitiveness. India's progress towards becoming the third largest economy of the world will depend on enhanced productivity, in manufacturing, services and agriculture. The recent policy Initiatives taken by the Government of India, including Production Linked Incentives (PLI) and rationalization of labor codes aim to add impetus to enhanced productivity and competitiveness.

The Udyog Manthan, organized by the Ministry of Commerce & Industry (MoC&I) early this year in association with the National Productivity Council (NPC), Quality Council of India (QCI), Bureau of Indian Standards (BIS) and industry chambers was a great step in this direction. The 45 sector-specific webinars which were organized for promoting quality and productivity in Indian industry shared several actionable recommendations that can be instrumental in advancing policy and regulatory

reforms and increasing productivity in the medium to long term. KPMG India has been at the forefront of various such initiatives and is delighted to have contributed towards the goal of advancing productivity in the country. Our extensive work and close association with various ministries and departments have enabled us to play our modest part in the recent story of India's economic development. We are honored to be a part of this new approach and look forward to supporting the Government in its journey.

Arun M Kumar, Chairman and CEO, KPMG India

NPC joins committee for empanelment of water audit agencies

Central Ground Water Authority, Ministry of Jal Shakti has constituted a Committee to fix the criteria for empanelment of water audit agency/experts. NPC is member of this committee. Water audits have become mandatory for industry, mining and infra projects extracting more than 100 KLD ground water.

NPC to assess zero liquid discharge facilities

Zero Liquid discharge (ZLD) refers to the installation of facilities and system which will enable industrial effluent for absolute recycling of permeate and converting solute (dissolved organic and inorganic compounds/salts) into residue in the solid form by adopting a method of concentration and thermal evaporation. NPC could help industries in assessing their ZLD facilities and provide adequacy certificate based on the study.

NPC takes up environment audit of waste management facility at BEIL

NPC has taken up comprehensive environment audit of one of the biggest hazardous waste treatment, storage and disposal facilities Bharuch Enviro Infrastructure Limited in Ankleshwar. The facility which commenced business in 1997 has 3.8 million ton of hazardous waste. The study will follow CPCB guidelines for conducting environment audit of Treatment, Storage and Disposal Facilities (TSDFs).

There are 45 Common Hazardous Waste TSDFs in 18 states and UTs of which, 17 are integrated TSDFs (having both secured landfills and incinerators); 12 are standalone incinerators, and 16 have only secured landfill facilities. Apart from Common TSDFs, there are 136 Captive TSDFs in 18 states and UTs of which, 6 are integrated captive facilities (having both SLF and incinerator); 85 are captive incinerators, and 45 are captive secured landfills.

NPC adds capability of remote proctoring for online examination

NPC has developed the capacity and capability to conduct examination through Remote Proctoring mode, suiting to the present day need for conducting examination in a safe and comfortable environment, even from place of work or from home while ensuring complete transparency, security and confidentiality. The Remote Proctoring application is designed for remote supervision of test takers and effective online administration of exams. With remote proctoring, the candidates and proctors/recruiters can be at different locations without compromising the integrity of the assessment. There are two modes of proctoring – Automated Proctoring and Live Proctoring.

Remote Proctored Exam Demo

Image source: youtube.com

Automated proctoring: The application takes on the role of the proctor in this type of proctoring. It generates alerts and red flags in case a candidate is cheating or using unfair means.

Live online proctoring: It involves a proctor remotely monitoring (Live) the candidates taking up an online assessment throughout the test duration. Our end-to-end assessment solutions make assessment activity almost automatic and efficient process.

NPC participates in ASSOCHAM's e-waste roundtable

NPC participated in virtual roundtable meet on e-waste management organised by ASSOCHAM on 16 July 2021. The roundtable meeting was chaired by Dr. Lovneesh Chanana, Chairman, ASSOCHAM National Council on IT/ITes and eCommerce and attended by over 200 participants. NPC recommended proactive role of government and other stakeholders to make EPR successful and shared the Taiwanese model in which National Recycling Fund has been created with contributions from producers in order to support recyclers. Currently, India's EPR system has no such national level fund.

Upcoming APO workshops

Programme Title: Training Course on Internet of Things Applications for Smart Manufacturing

Objective: Develop an understanding of IoT and its applications in manufacturing and digital transformation.

Duration: 25–27 August 2021

Programme Title: Conference on Social Empowerment in Agriculture

Objective: Introduce the concept and indicators of social empowerment for improving community development in the agriculture sector.

Duration: 2 September 2021

Programme Title: Workshop on Agricultural Innovations

Objective: Understand recent innovations in agriculture and their prospective trends in the future, including those relating to food.

Duration: 15–17 September 2021

Programme Title: Training of Assessors for the Green Productivity Specialists Certification Program

Objective: Develop qualified, competent assessors for NPOs that will serve as APO-accredited certification bodies (CBs).

Duration: 23–25 August 2021

Programme Title: Workshop on Cyber Security and Network Resilience Approaches for Industry 4.0

Objective: Learn about the fundamentals of cyber security and network resilience approaches in relation to Industry 4.0.

Duration: 7–9 September 2021 (three days)

Programme Title: Workshop on Blockchain Solutions for SME Productivity

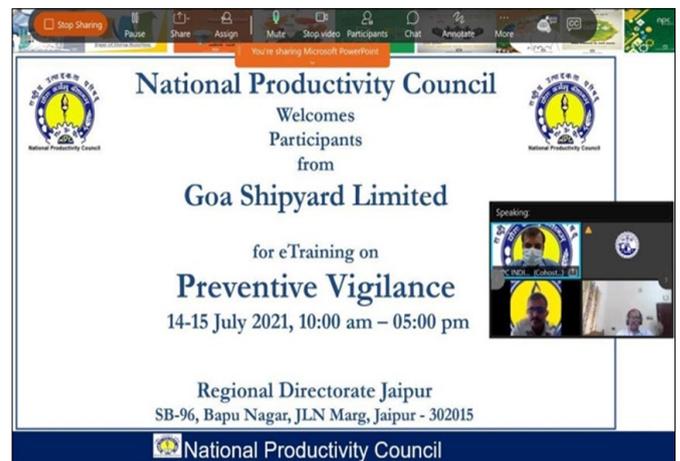

Objective: Share case studies on the adoption of blockchain technology for productivity enhancement.

Duration: 25-27 August 2021
