

Virtual Webinar on Layered Process Audit

Webinar Title: **Layered Process Audit**

Expert Speaker: Paresh C. Shah

About Webinar: - Zero defect is aim of any organization. Achieving zero defect requires systematic process problem identification & its solutions. It's possible with a layered process audit (LPA) program. With LPAs, every layer of management participates in regular checks of high-risk processes. It's a tall order for many organizations, requiring a solid plan and a prepare team. To build an effective LPA system, automotive and aerospace manufacturers should focus on the plan-do-check-act approach.

Webinar Coverage:-The coverage will be What is Layered Process Audits & Why Implement Layered Process Audits.

Speaker Profile: Former Chief Operating Officer of one of fortune 500 MNC.
