

BUSINESS CONTINUITY MANAGEMENT SYSTEM

About Webinar:-

Owing to the COVID-19 pandemic outbreak, businesses are facing disruption in processes and supply chain. This pandemic situation has exposed the readiness of organisational processes and systems to overcome such challenges.

Through development, implementation, and maintenance of a viable Business Continuity Management system, organisations can adopt the systematic and effective approach to restoring and restarting critical and important functions and processes. And most importantly, it provides a layer of protection for their most important assets, information and reputation. This webinar will discuss the approaches for strengthening the supply chain and processes.

Webinar Coverage:- Analysis of the situation. Certain important aspects of Business Continuity Management. Strengthening the Links in Supply Chain Management. Innovative and out of the box thinking. Current Challenges. Managing Change for Competitiveness.
