

Webinar Title : DOCUMENTING AND IMPLEMENTING AN EFFECTIVE ENVIRONMENT MANAGEMENT SYSTEM BASED ON ISO-14001:2015

Registration Fee (including GST):- Rs 99/-

About Webinar : - ISO 14001:2015 specifies the requirements for an environmental management system that an organization can use to enhance its environmental performance. It helps organizations to improve their environmental performance through more efficient use of resources and reduction of waste, gaining a competitive advantage and winning the trust of stakeholders.

An Environmental Management System (EMS) based on ISO 14001:2015 standard consists of a set of processes and practices that enable an organization to reduce its environmental impacts and increase its operating efficiency. The EMS provides a framework that helps an organisation achieve its environmental goals through consistent control of its operations.

Organisations that have implemented an effective ISO 14001 EMS will be directly benefitted through:

- **Increased demand for their services and products through a marketing advantage;**
- **Lowering business costs through reducing resource consumption and waste production;**
- **Improving their environmental performance, reducing their environmental impact and controlling environmental risk;**
- **Achieving their environmental commitments and environmental policy requirements;**
- **Meeting their environmental legal requirements;**
- **Committing to social responsibilities;**
- **Promoting a positive image with stakeholders, customers and employees; and**
- **Retaining environmental knowledge and ensuring information is effectively communicated.**

An EMS is a continuous improvement process with the following basic elements:

- reviewing the organisation's environmental goals**
- analysing its environmental impacts and legal requirements**
- setting environmental objectives and targets to reduce legal requirements**
- establishing programs to meet these objectives and targets**
- ensuring employees' environmental awareness and competence**

The requirements of ISO 14001:2015 standard should be clearly understood for effective design and implementation of an Environmental Management System based on ISO 14001:2015 standard .

The webinar will focus on how to document and implement an Environmental Management System based on ISO 14001:2015 standards so that organizations can take maximum benefits from it.

Webinar Coverage:-

- Introduction about ISO-14001:2015 Environment Management System,
- Benefits of implementing ISO 14001:2015 system,
- ISO 14001:2015 Standard Structure
- Terms and definitions
- ISO 14001:2015 Standard Clause wise Explanation
- Environment Aspects and impacts, Determination of Significant Environmental Aspects,,
- Mandatory documented information/records as per ISO 14001:2015 standard,
- How to implement an Environment Management System based on ISO 14001:2015 standard
- ISO 14001:2015 certification process
- Case study and examples

Speaker Profile :- Mr. Ankur Dhir is an Electronics and Communication Engineer and MBA in Total Quality Management. He is a national level Consultant cum Trainer for ISO Management Systems and Lean Manufacturing. He is a Lead Assessor for ISO- 9001, ISO 14001, ISO 27001 and ISO-45001 management system. He is having more than 18 years of work experiences as consultant cum trainer.

Register to learn (Key Learning's' in bullet points):

- Introduction and benefits of ISO-14001:2015 Environment Management System
- ISO 14001:2015 Standard Clause wise Explanation
- Environment Aspects and impacts, Determination of Significant Environmental Aspects,,
- Implementing EMS as per ISO-14001:2015

Thanks and regards
