

Webinar Title: Application of Six Sigma as a Management Tool

Registration Fee (including GST):- Rs.99/-

About Webinar Program -

Six Sigma was originally introduced as a set of techniques and tools for process improvement. It was developed by **Motorola** in **1986**. Jack Welch made it central to his business strategy at General Electric in 1995. Though as a concept, its origins may be traced to **Carl Friedrich Gauss (1777-1855)** who introduced the concept of the normal curve but as a strategic business tool Jack Welch implemented it in General Electric in 1995. This webinar addresses the methodology and approach for an organisation wide implementation. The webinar would illustrate the interdependent application of the trilogy; Six sigma, Lean and TQM, demonstrating the complementary role of each approach to develop much needed Customer-Business-Employee centric organisation.

Webinar Course Coverage:-

- What is Six Sigma approach?
- Trilogy of Six Sigma, Lean and TQM; how they work together
