

# Virtual Webinar: Value Stream Mapping (VSM)

**Value Stream Mapping** is a Lean Management tool for analyzing the current state and designing the future state of Material & Information flow in any organization. Basically this is the heart of Lean management system. By attending the webinar, participant will be able to draw current state VSM, design the future state VSM and plan projects for improving overall productivity within the organization and beyond.

## Webinar Coverage:

1. 7 types of waste
2. Waste removal operations
3. Mapping Current state and future state
4. Uses and deliverables of VSM

## Speaker Profile:

Chandan Chaudhary, is Assistant Director (Industrial Engineering), serving at Regional Directorate, Gandhinagar of National Productivity Council. He has over 10 years of experience on the shop-floor as-well-as in the field of providing consultancy and training in the field of Industrial engineering. He has been involved in over 20 consultancy projects for Government, Public Sector and Private Sector clients. He has also been involved in phase-wise audit of lean implementation in MSME cluster units in the state of Gujarat and Madhya Pradesh under the Lean Manufacturing Competitiveness Scheme of Ministry of Micro, Small & Medium Enterprises, Government of India.
