

Webinar Title: Determining KPIs for Lean Implementation

Registration Fee (including GST): Rs. 354/-

Speaker:

Shri Swarupan Das
Deputy Director
National Productivity Council, Bengaluru

Webinar Date: 29.10.2020

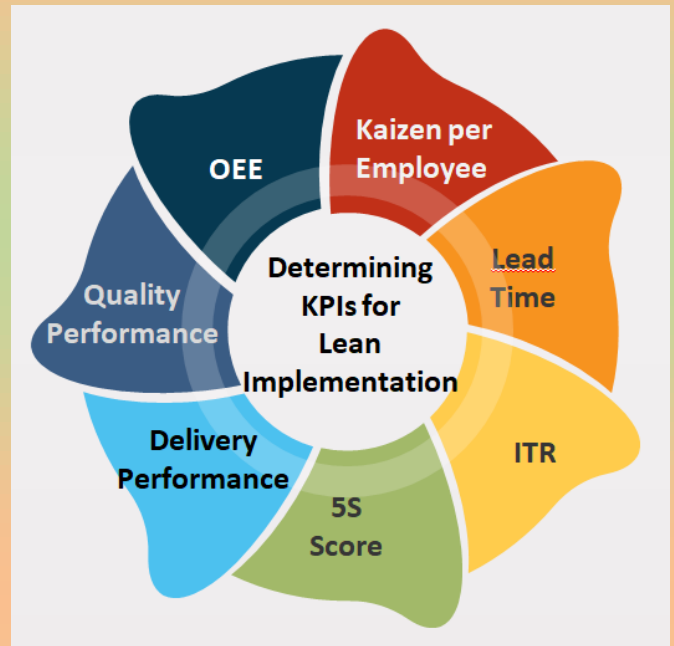

Time: 3:30 pm to 4:30 pm

Duration: 60 minutes

About Webinar:

Organizations implementing Lean have to select monitoring parameters which are to be reviewed on both short term basis – like daily or weekly as well as on long term basis like monthly, quarterly, etc. These parameters which can be also called KPIs have to be carefully chosen to ensure that they do not over burden the employees in addition to their regular work. KPIs should be selected in such a way that employees can progressively adapt to the culture which focuses on value maximization and waste minimization.

KPIs applicable for a department may not be applicable for another department. Similarly KPIs suitable for a sector of industry may be irrelevant for another sector because of various factors like availability of resources, process adopted by the organizations, etc. In long run the successful implementation of Lean depends a lot on the KPIs selected by the organization.

Webinar Coverage:

- Overview of Lean Implementation
- Commonly used KPIs in organizations implementing Lean:
- 5S KPIs
- Selecting KPIs best suitable for company based on its mission
