

INDUSTRY 4.0

NATIONAL PRODUCTIVITY COUNCIL Webinar

IIoT in Action - Experience live solutions to real world business problems

16th of September 2020, 03:30 PM – 05.00 PM

About Webinar

The hype around Industry 4.0 and IIoT is inescapable now-a-days but with limited or no mention of tangible, real-world implementation with quantified, demonstrable results. In this webinar, we will demonstrate Industry 4.0 smart manufacturing use cases in discrete manufacturing, process and service industries in action. No slideware, only software in action.

Some of the key benefits to customers

- Reduction in Specific Energy consumption
- Improved product quality
- Increased machine availability and customer satisfaction

Webinar Coverage

- Industrial applications of IoT
- Benefits of use of IoT in industries
- IoT solution for discrete manufacturing (Live demo)
- IIoT solution for continuous manufacturing process (Live demo)
- IIoT solution for OEM for services (Live demo)

SPEAKERS

1. Mr Nakul Patil is an Instrumentation & Controls engineer with 12+ Years of experience. He is supporting Smart Manufacturing & Digitization initiatives at Ecoaxis.

2. Mr Bhavesh Deulkar Is an Electronics & Telecomm. Engineer with 10+ Years of experience. He manages the field implementation and continuous improvements in the IIoT products at Ecoaxis.

3. Dr. Indu R. Keoti (Pillai), is a PhD holder from IIT Bombay and a B.E.E. certified Energy Auditor. She specializes in renewable energy, energy efficiency, and industrial process understanding.
