Presents Webinar on

Best Interventions in Solid Waste Management – A Real-time Successful Case Studies

Program Objective:

The objective of this webinar is to analyse how various Urban Local Bodies (ULBs) have created a benchmark for themselves to achieve their goal in successfully implementing Solid Waste Management with technological interventions as well as behavior change development on ground for its continual development. It also gives a deep insight how national, state and ULB policies have been integrated to formulate a strategic planning and approach to build up the environment sound waste management practices.

Webinar Coverage:

- ULB lead innovation and best practices in handling Solid Waste Management
- Tools and Techniques adopted in developing a sustainable model
- Stakeholders engagement and responsiveness
- Integration of Inclusivity and Sustainable solid waste management
