INTERNAL AUDITING OF INTEGRATED MANAGEMENT SYSTEM
(ISO 9001:2015; ISO 14001:2015; ISO 45001 :2018)

About the Program

Quality Management has been experienced as a very successful organizational process to satisfy customer requirements every time through a system of planning, control and continuous improvement by involving everyone in the organisation. In order to achieve TQM (Total Quality Management) goal, in addition to commitment and involvement of the human system, an organisation is required to have a sound quality management system, the strength of which determine the success or failure of a company. The basic objective behind the journey of Quality Management System (QMS: ISO 9001) is to fulfil the requirements of customer, complying statutory/regulatory requirement for customer satisfaction along with organizational performance improvement for sustainable competitive advantage

Environmental Management has become an integral part of any business organisation to have a sustainable model of growth. ISO 14001 (EMS) is the standard of ISO which deals with the nuances on the EMS and can be instrumental to have a proper documented system in place to address the challenges faced by an organisation with regards to Environment management.

Occupational Health and safety is one of the most important factor in the growth of an organisation and its productivity. The burden of occupational injuries and diseases is significant, both for employers and the wider economy, resulting in losses from early retirements, staff absence etc. ISO 45001:2018 specifies requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use, to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its OH&S
