

Webinar Date – 31/05/2021 | Duration – 90mins | Time – 3:00PM to 4:30PM  
Registration Fee: Rs. 354 (Including GST)

### **About Webinar**

Project Management is a set of principles, methods, and techniques that people use to plan effectively and control work. Projects are temporary, having definite beginning and end, but each of them is unique because the outcome they create is different in some distinguishing way from similar project executed elsewhere. The principles, methods, and techniques devised help the Project Managers to complete them on schedule, within allocated budget, and in full conformance to project specifications. In broader view they help any organization to achieve their respective goals, such as productivity, quality, cost effectiveness, etc.

### **Webinar Coverage**

- Project Development Cycle
- Project Planning Techniques
- Budget Planning
- Performance Monitoring
- PMP Vs Prince2 Certifications
