

NATIONAL PRODUCTIVITY COUNCIL Webinar

**“Tomorrow : Your Reward for working safely today” –
Analyzing Inherently Safer Design opportunities**

26th November 2020, 11:00 AM – 12.30 PM

About Webinar

“What you don't have can't leak”

Implementation of effective chemical process safety measures will prevent accidents occurring in the manufacturing units. Inherent safer design (ISD) is a part of chemical process safety that helps you to gain an overview of potential dangers, effects, consequences associated with the plants. At the end of the webinar, you will be able to identify the hazards associated with your process and work out on the solutions to reduce them.

Webinar Coverage

- Concept of 'Inherently Safer Design'
- Strategies applied to reduce the risk in process Industries
- The 8 layers of Protection in any process plant
- Implementation of the strategies
- Discussion on latest case studies
- Brief overview of Process hazard Analysis in Process safety & Risk Management

SPEAKER

**Ms. Hemaleka Balu
Manager, Tata Chemical Ltd.**

Ms Hemaleka has more than 15 years of experience in Projects, Technical services, Technical audits, and Quality assurance. Her various certifications include Dupont process safety training, Operations management, Aspen plus, Energy auditor, Six sigma green belt.
