## NATIONAL PRODUCTIVITY COUNCIL

Presents Webinar on

# Succession Planning

On 28<sup>th</sup> October 2020 at 11:00 Hrs. to 13:00 Hrs.

One of the most disruptive things that can happen to a company is the sudden need to replace a leader. More than half of companies today cannot immediately name a successor to their CEO should the need arise. Without a defined plan in place, a leader's departure can create confusion and massive risk to an organization's stability. To be truly effective, succession plans must be created long before they are to be enacted. More often than not, you will have an occasional situation arise for which you are unprepared.

Succession planning is a strategy identifying and developing critical talent for the future — not just at the top but for major roles at all levels. It helps your organization prepare for all contingencies by preparing high-potential workers for advancement.

**Webinar Coverage:** Succession Planning is essentially planning for and executing smooth transitions of key positions. This online workshop will help participants understand the process, the types and the stages of Succession Planning and includes recruiting new talent, executive search, selection assessments, on boarding the new talent, and successfully transitioning the new executive in and the old executive out.
