Registration Fee: Rs. 300 /- (inclusive of GST)

Webinar on

“Vapour Absorption Refrigeration Technology for Industries”

Webinar Date: 15/05/2021 Saturday | Time: 03.00 – 04.30 PM | Duration: 1 ½ hr

E-certificate will be issued

About Webinar:

Vapour Absorption Refrigeration (VAR) machine is finding its importance more and more for cooling and heating (both comfort and process) applications as the need for minimizing the energy bills and maximizing the utilization of waste heat or cheaper fuel is increasing. Advancements made in vapour absorption refrigeration technology have enhanced its potential areas of application. This webinar will discuss on VAR machine working principle, types, advantages compared with vapour compression refrigeration (VCR) system and its innovative applications with case studies.

Webinar Coverage:

VAR machine Technology, Types, Comparison with VCR, Advantages, Application and Case Studies.

Speaker's Profile: Mr. Ranga Vamshi is a Post graduate in Energy Systems from University of Petroleum & Energy Studies; BEE certified energy auditor, ECBC master trainer and IGBC AP. Has over 10 years of experience in the field of Energy Efficiency & Audit, HVAC, Sustainable Development, Green Buildings & ECBC and served as a consultant in BEE/ UNDP projects.
