

# Digitalisation in Manufacturing

**Expert Speaker (Name/ Designation)** – Manish Jain, founder of Felidae Systems

**Webinar Date:** 29 September 2020

**| Duration:** One hour

**About Webinar (Brief One para):** - As the Internet has brought down the marginal cost of any information to Zero, we can acquire knowledge with no cost. Digitalization is set to offer the same for all manufacturing processes we use. But the biggest question is where to start, and how to identify the fastest return on investment of Digitalization. In this talk, we will be discussing how digitalization can help in all industrial processes viz. Utility, Quality, Supply chain, and Production and how digitalization will help industries to be leaner, greener and more efficient.

**Webinar Coverage:-** (I) Utility management through digitalization (ii) Productivity measurement & improvement through digitalization (iii) Quality & Rejection Control through digitalization (iv) Case studies

## **Speaker Profile (Brief One Para & Photograph):-**

**Manish Jain** is the founder of Felidae Systems and co-founder of PM Electronics. He is an alumni of IIT Roorkee. Prior to Felidae Systems, He has worked with ABB corporate research center, Continental automotive, Raymarine and Infosys. He has vast experience in various Business domains: Automotives, Industrial Automation and Marine Navigation.

**Date:** - 29 September, 2020
