**Webinar on Environmental Risk Management (Aspect-Impact Analysis)**  
**Sept. 18<sup>th</sup>, 2020 at 11 AM**

**About the Webinar:**

In layman's terms, an aspect is a cause or reason and an impact is an effect or result on the environment. Within the Environment Management System, environmental aspects and impacts should be analysed for the risks and opportunities they present. Surroundings in which an organisation operates, including air, water, land, natural resources, flora, fauna, humans and their interrelation. Surroundings in this context extend from within an organization to the global system.

This webinar covers the benefits of Environment Management System such as Improved operational efficiencies, Better utilization of materials & resources, Reduced wastages & costs Increased access to world market, Improved staff morale & work environment, Assurance to interested parties, Enhanced corporate image Better relationship with Regulators.

This shall be useful to students, academicians, entrepreneurs, HSE managers, Sustainability managers, engineers and all levels of professionals who want to understand Aspect-Impact Analysis which is a requirement of ISO 14001 international standard.

**Key Learnings:**

- Terminology & methodology of ISO 14001
- Evaluation of direct & indirect aspects
- Principles of Environment Risk Management
- Significant Aspects identification
- Records management methodology
