Most of the wastewater treatments fail to perform due to various reasons such as changed production scenarios, poor design criteria, inadequate O & M practices, untrained manpower, etc. The performances of most plants are left to chance rather than choice. Therefore performance evaluation of a wastewater plant is very crucial to improve the process, retrofitting of treatment system etc.

This Webinar aims to cover the following:

- Parameters to be analyzed for evaluation of performance of wastewater treatment plants
- Performance evaluation
 - To address wastewater compliance issues
 - For equipment design consideration and process improvement.
 - For upgradation, expansion and retrofitting of treatment system.
- Suitable case studies

About the Expert Speaker:

Shri. N.K.Kuttiappan,
Executive President
LVK Enviro Consultants

- An expert in municipal and industrial wastewater treatment and management having more than 35 years of rich experience in consultancy and training.
- Empanelled Auditor with IRQS and Empanelled Assessor with QCI-NABET
