

## **Online Training Programme on Foresight and Scenario Planning for Efficient Resources Management during 14-15 Oct 2020, 2.30 to 5.00 PM**

### **INTRODUCTION:**

Future leaders talk about disruption as the new order of the world, and there is no absence of strategic insight but there is an absence of capabilities to make a better decision. The COVID-19 pandemic has forced Government and private organizations to think alternatively, as what we thought in the past not necessarily will do in the future with the market economy. To foresee the alternative, initiate actions, strategies to achieve success, are crucial in disruptive economies to build innovative sustainable capabilities. Hence, this course illustrates the foremost points to create a future for the desired objectives. It would be useful for decision-makers to understand innovation, sustainable strategy to solve complex dilemmas, allows participants to generate new ideas and knowledge about scenario planning for efficient resource management.

#### **FOCUS:**

To build the skill and capability of using foresight as a practical tool in designing policies and future strategies that exploit innovations and technologies for the benefit of government, institution, NGOs and companies in transition or developing economy.

#### **LEARNING APPROACH & METHODOLOGY**

Interactive live session on CISCO-WebEx for teaching, presentation discussion and Q&A session. The study material/ templates will be shared through an email/ google document.
