

IMPLEMENTAION ARRANGEMENTS

- The scheme will be implemented in mini clusters spread all over the country for all manufacturing sectors.
- The Scheme will be implemented by National Monitoring and Implementing Units (NMIUs), under the overall directions of DC (MSME). It is expected that once MSMEs are introduced to the benefits and savings that accrue from LM techniques, they would themselves continue the Scheme at their own expense. T
- The Scheme will be implemented in 500 clusters spread all over the country during the 12th Plan period. To ensure effective and successful implementation of LMCS, need based awareness program(s) will be organized so that the potential participants may assimilate the scheme provisions and only likeminded entrepreneurs join together for effective implementation of the scheme.
- A three tier structure has been proposed in the Scheme. A Mini Cluster (MC) would be formed at the lowest tier. The units of the MC would work with the assigned LMC to implement the specific LM Techniques. The next higher level tier.
- National Monitoring and Implementing Units (NMIUs) will be 4 responsible for facilitating, implementation and monitoring of the scheme. At the highest level, SSC will provide overall direction to the Scheme and will be headed by the Development Commissioner (MSME).

IMPLEMENTATION FRAMEWORK IS AS GIVEN BELOW

APPROACH AND MODUS OPERANDI OF THE SCHEME
